Washington, DC 20426

RE: *Cheyenne Plains Gas Pipeline Company, L.L.C.*, Docket No. CP07-128

Dear Mr. Chairman:

The Wyoming Pipeline Authority (the "WPA") is charged by the State of Wyoming with facilitating the development of pipeline infrastructure inside and outside the State of Wyoming to enhance natural gas development within Wyoming and to develop and maintain access to markets for the state's abundant natural gas resources.

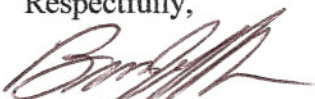

According to the Energy Information Administration, Wyoming is now the third largest natural gas producing state, with three of the top ten largest gas fields in the U.S. Over ninety percent of the natural gas produced in Wyoming is exported from Wyoming for the benefit of consumers elsewhere in the United States. Consequently, the State of Wyoming has a substantial economic interest in pipeline facilities that enable the disposition of the natural gas produced in and exported from Wyoming.

On April 2, 2007, Cheyenne Plains Gas Pipeline Company, L.L.C. (Cheyenne Plains), filed an application at Docket No. CP07-128-000, pursuant to Section 7(c) of the Natural Gas Act (NGA), for a certificate of public convenience and necessity authorizing the construction and operation of a new compression facility, the Kirk Compressor Station, comprised of one 10,310 horsepower compressor unit, to be located in Yuma County, Colorado. The project is designed to transport up to 70,000 Dth per day on the Cheyenne Plains' mainline.

The construction of these facilities will add critical capacity to a portion of the interstate pipeline grid that conveys abundant rocky mountain region natural gas to the rest of the country. The project has received a favorable environmental review and the WPA understands that a contractor is lined up and ready to begin work.

The WPA respectfully urges the Commission to expeditiously grant a certificate in this docket so the work on the expansion can begin and the facilities can be placed in service as promptly as possible.

Respectfully,

Brian Jeffries
Executive Director
Wyoming Pipeline Authority
